

ESCAPE

the Conference

Watch the Experience

WHY ESCAPE THE CONFERENCE

We have all sat through workshops where someone lectures on why education should stop lecturing. Most educators understand that experiential learning is important, they just need to know how to facilitate it effectively. We created Escape the Conference to allow educators to experience the problem solving pedagogy we believe is essential for the future of education.

OUTCOMES ESCAPE THE CONFERENCE CREATES

Role model educating to ISTE Standards

Through station-based learning, participants are empowered to leverage the 4C's and experience micro-leadership with different challenges designed for different skillsets.

Equip your team with strategies to engage students

We tailor stations to the pedagogical principles you want to emphasize with your educators, tying them in to the larger storyline of the escape experience.

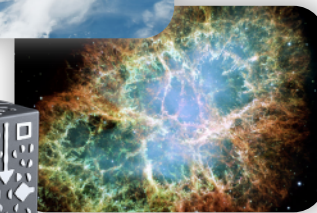

Build comradery across departments and teams

Break down social barriers with interconnected challenges that require effective communication and collaboration in a time-pressured environment, creating an unforgettable shared experience for all involved.

Space Race

Leveraging augmented reality through the Merge Cube and HP Reveal softwares, teams identify facts about celestial planets that correlate to segments of various phrases. Testing their ability to find, filter, and apply information using technology, they must think critically to identify that some facts are true, while others are false, enabling them to collaborate on decoding a secret phrase, which unlocks the clue leading to their next station.

WHAT PAST ESCAPEES HAVE SAID

Wow! Our teachers' minds were blown away with this experience! We learned together using collaboration, creativity, communication, critically thinking and motivation in a way that we want our students to be learning in the classroom.

Every session was interactive, engaging, and inspiring. I learned how to let students lead the learning - it was **the best PD ever**.

This was the best professional development we have had by far. Every teacher had a blast, every teacher is going to be able to use this in their classroom, and it **overall is the most, dynamic, fun, and engaging PD I've ever been a part of as an educator**.

DO YOU HAVE WHAT IT TAKES TO ESCAPE THE CONFERENCE?
